EDUCATION

University of Massachusetts, Amherst

Break Through Tech AI @ MIT · CodePath · Founders Circle · Dean's List

B.S. Computer Science + Business

Aug 2024 – May 2028

EXPERIENCE

IT Infrastructure & Service Operations Intern

June 2026 – Present

Teachers' Retirement System of the City of New York

New York, NY

- Built a **PowerShell** script to query Active Directory memberships and last-logon data, flagging **300+** stale accounts for recertification
- Supported **Kubernetes** deployments on **AWS EKS** through CI/CD pipelines in CodePipeline & Build, using CloudWatch to validate staging workloads
- Assisted configuring **AppLocker** allowlisting on 9 workstations & **BeyondTrust** access controls across 3 service tiers, strengthening security
- Triaged **12+** **ServiceNow** tickets diagnosing Windows software, driver, connectivity failures via Remote Desktop

Full-Stack Developer

Feb 2025 – Present

College of Humanities and Fine Arts, UMass Amherst

Amherst, MA

- Built a Python **Web Scraper** to automate migrating 12 course modules, performed QA/QC checks eliminating inconsistencies with 0 data loss across transferred content
- Diagnosed 2 synchronization failures between Canvas LMS and Pressbooks through integration testing, optimizing **MySQL** queries to help 400+ students
- Developed **120+** **interactive assessments** in HTML/CSS/JavaScript, standardized DOM structure ensuring cross-browser compatibility

Open Source Developer

Jan 2025 – Apr 2025

CICS Open Source Apprenticeship, UMass Amherst

Hybrid

- Prototyped map-navigation features in **Rust** for Veloren (10,000+ commit RPG), filing an upstream waypoint-behavior issue with maintainers
- Configured **GitLab CI pipelines** to build and deploy team documentation on merge, replacing manual publishing for a 3-person Agile **Team**
- Traced 8+ pull requests through review, revision, merge to map **code-review** standards in open-source codebase

PROJECTS

TableFinder @ UMass Amherst Dining | *React, TypeScript, Flask, Firebase*

Sep 2025 – Present

- Built a dining hall occupancy platform with NFC web-app check-ins, syncing table vacancy in real time through Firebase at 1,000+ daily check-ins
- Implemented **TTL-based session expiry** to auto-release stale table claims, removing manual checkout issues
- Validated with **100+** student testers under live dining-hall load, resolving check-in failures ahead of rollout

CapitolWatch Insider Trading | *Python, FastAPI, PostgreSQL, React, Docker*

Jul 2026

- Built a **data pipeline** pulling 72,000 congressional stock trades from scanned PDF filings, using OCR and fuzzy name-matching in **PostgreSQL**
- Analyzed trade timing of 350+ members by permutation and false-discovery-rate correction, flagging 4 portfolios
- Automated** agent for daily data update; **cached** unchanged filings to save reprocessing, **FastAPI** backend

Sanskritized Hindi Lexicon | *React, TypeScript, CSS, JSON, NoSQL*

May 2026

- Launched a public dictionary reaching 1,000+ users, combining **NFD normalization** with fuzzy matching to support search across 1800+ entries
- Cut load time with **lazy-loading**, paired debounced input with client-side indexing keeping search **NoSQL**
- Shipped audio pronunciation using **Web Speech API**, saving preferences locally with XSS-safe rendering

SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, Rust, SQL, PowerShell

Libraries: React, FastAPI, Flask, Node.js, REST APIs, Pandas, NumPy, scikit-learn

Data & Infrastructure: Kubernetes, PostgreSQL, MongoDB, Firebase, Supabase, Docker, Linux/Unix, Azure, AWS

Tools & Testing: Git, CI/CD, PyTest, Vitest, ServiceNow, Postman, Jira
